

# 5 HELPFUL TIPS AND TRICKS

## 1 Connect Mats Together

Need to create a long run of matting? the Stand-Safe™ connector can seamlessly join multiple mats together.

## 2 Good Housekeeping Goes a Long Way...

Your mats will last longer if you take care of them! Here are some cleaning tips:

- Avoid build-up by sweeping or dry-mopping daily.
- Mats can be wet-mopped with a mild soap or degreaser.
- Rinse off residue with a hose or power washer.

## 3 Don't Stack Up the Matting!

Ensure you only have one mat under your feet! Stacking any matting will not only reduce the ergonomic benefits but will also create trip hazards.

## 4 Full Coverage Means Proper Support

Make sure both feet are securely positioned on the mats, avoiding any overhang. We also advise employees to spend at least 5 out of every 8 hours standing on the matting. Proper usage of the mats will allow for a pain-free workday!

## 5 Hang up Mats for Storage

Using Stand-Safe™ vertical or horizontal hangers, you can easily store mats if needed.
